## **UNITED STATES GOLD AND COPPER CORPORATION MINES IN NEVADA**

The United States Gold and Copper Corporation owns two groups of claims, the Acacia of 60 acres, and the Sapphire of 180 acres, respectively, a total of 240 acres in the Humboldt mining district, Humboldt County, Nevada, one of the richest mineral districts in the United States.

The property is now being actively operated by means of tunnels, doing away with expensive machinery.

The Sapphire-Union group will be shipping pay ore within six months.

The Corporation operates as an exploration company and its property is paid for.

There are no debts. The Company has one million four hundred thousand shares in the treasury out of a total of \$2,500,000 for development and new properties.

The Humboldt district has produced \$90,000,000 in gold and silver to date, and is only scratched. It will produce many more millions, as some of the most active mining men of Nevada are operating there now.

A boom which will rival Goldfield is in sight, now, and this summer will see more activity here than in any camp in Nevada. There are eight companies operating at present, and two are shipping ore running from \$100 to \$350 per ton in gold and silver.

The United States Gold and Copper Corporation will be shipping by six months or less, when the stock will be selling for much higher prices.

We unqualifiedly endorse this mining corporation as being the best we have had brought to our attention out of one hundred and fifty submitted.

Price of shares, 40 cents; par \$1.00, full paid and non-assessable; for immediate application. The next allotment will be at 50 cents.

## **FRANK SIDDALL'S SOAP COMPANY**

FRANK SIDDALL'S SOAP COMPANY is incorporated under the laws of the State of New Jersey, with a capital of \$300,000, divided into 300,000 shares of the par value of \$1.00 each, fully paid and non-assessable.

The Company owns outright the soap business formerly conducted by Mr. Frank Siddall personally, machinery, including plant, formulas, copyrights, and its entire organization. The business was established by Mr. Siddall in 1873, over 30 years ago, and has been in continuous operation since, manufacturing the famous Frank Siddall Soap, a household commodity of unquestioned merit, known throughout the country as the best of its kind and possessing a reputation established at a cost exceeding half a million dollars in cash and over 30 years of hard work and honest dealings. Almost everyone knows of Frank Siddall as a pioneer soap maker of the country and almost every housewife knows Frank Siddall's Soap as one of the most meritorious articles ever introduced into the household.

The factory of the Company is a complete one in every respect, size 80 by 150 feet, and thoroughly equipped, containing all the necessary appliances for conducting the business, even to the printing and waxing of the wrappers for ironing purposes. It is located near the Delaware River at Beach

and Brown Streets, Philadelphia, with all the advantages of river transportation, while its railroad transportation facilities are of the first order, the tracks of the Baltimore and Ohio R. R., Philadelphia and Reading R. R. and the Lehigh Valley Railroad, all in close proximity.

The liabilities of the Company, comprise only its capital stock. There are no bonds, preferred stocks, liens or encumbrances—each and every stockholder and director being on an equal basis, a feature of inestimable importance from an investment standpoint. All the earnings of the Company go directly to our stockholders, after current expenses are provided for.

### The Proposition in a Nutshell

Business established in 1873. Operating present factory over quarter of a century. Manufacturing the best laundry soap made. Managed by business men of highest integrity and standing. Over half a million dollars expended in building up the business.

Present price of stock \$1.25 per share, full paid and non-assessable. Pays 8 per cent. annual dividends.

## FIRST MORTGAGE 5% THIRTY YEAR GOLD BONDS OF THE PUBLIC SERVICE CORPORATION OF VIRGINIA

Interest payable January and July first at the Office of the Columbia Trust Company, New York, Trustee. Bonds dated July 1st, 1906. Denominations \$500 and \$1,000, with provision for registration of principal.

The property covered by these bonds is located at Hampton and Phoebus and was completed this year, is of the most modern construction (being that of the United Gas Improvement Company, Philadelphia), and complete in every detail for producing gas for both lighting and fuel purposes at the lowest possible cost; the works are located most conveniently on the line of the Chesapeake and the Ohio R. R. with a spur track laid into the property.

The Company has at the present fifteen miles of pipe laid in the cities of Hampton and Phoebus, and the buildings are of most modern construction, made of concrete brick. The plant is of sufficient size and character to take care of present needs and also of future demands of increased business.

The charter of the Public Service Corporation of Virginia and the franchises granted by the towns of Hampton, Phoebus and the county of Elizabeth City, are most liberal and afford every protection to the Company, being absolutely exclusive for the term of thirty years. The Company has no competition.

Hampton and Phoebus contain a population, with their suburbs, inclusive of Old Point Comfort, Fortress Monroe, National Soldiers' Home and the Hampton Institute, of 25,000, are growing and prosperous towns and bid fair to increase in population henceforth.

With nearly 1,500 customers on its books and having sold 1,200 gas stoves for cooking and heating purposes, the Company confidently state earnings will be at least three times the interest charges on its bonds. Under the grant of the franchise the Company are charging \$1.50 per 1,000 feet with a discount of 20 cents for cash in ten days.

The Officers and Directors comprise men of high standing in the community.

J. W. ROWE, President, also President First National Bank, Hampton, Va.

W. S. GRAY, W. S. Gray & Co., Chemicals, New York.

CHAS. BAKER, Treasurer Baker & Vaughan, Bankers, New York.

J. M. CUMMINGS, Director Bank of Hampton, Bank of Phoebus.

S. C. REES, Cashier, Bank of Phoebus, Phoebus, Va.

H. F. ELAM, Attorney, Hampton, Va.

J. A. BARHAM, Vice-President, also Manager Peninsular Pure Water Co., Hampton, Va.

J. D. BAUCUS, Attorney, New York.

F. V. BAKER, Capitalist, New York.

### Record of Gas Securities

The high favor in which gas bonds in general stand in the mind of the investor to-day is justified by the fact that the earnings of these properties show a nearly uniform increase, whether furnishing gas independently or in direct competition with electric lighting.

We offer these bonds for a limited time only, at 95 and interest.

# GOLDFIELD-SCRANTON MINING COMPANY

## OFFICERS:

ALFRED HARVEY, President,

EDWARD S. JONES, Treasurer,

LOUIS LA FONTAINE, Assistant Secretary.

ELMER H. LAWALL, Vice-President,

JOHN H. LADWIG, Secretary,

## DIRECTORS:

ALFRED HARVEY, Silk Manufacturer, and Director of Lackawanna Trust & Safe Deposit Co., Scranton, Pa.

W. W. WATSON, Attorney-at-Law, Director of Traders' National Bank, Scranton, Pa.

EDWARD S. JONES, Coal Operator and President Citizen's Bank, and Director Traders' National Bank, Scranton, Pa.

T. M. RIGHTER, Coal Operator and President Mt. Carmel Banking Co., Mt. Carmel, Pa.

JOHN H. LADWIG, Merchant, Scranton, Pa.

ELMER H. LAWALL, Treasurer International Text Book Co., and Mining Engineer, Wilkes-Barre, Pa.

GOLDFIELD-SCRANTON MINING COMPANY is the corporate result of the efforts of a number of prominent men who have achieved success in law and in the banking business or in commercial pursuits, and who are now the Officers and Directors of the Company. These men, prior to the incorporation of the Company, expended more than \$150,000 of their own means in prospecting, purchasing and in developing the mines to such an extent that they feel justified in inviting the public to join in an enterprise that bids fair to yield immense returns in the near future.

The properties of the Company are located in Goldfield, Nevada, and in the Hailey mining district, Idaho.

The Hailey mining district is the largest gold producing territory in Idaho, containing some of the most noted mines in the West. The Company's property comprising 220 acres, is practically surrounded by mines of this character and there is every indication that it will develop into equally as wonderful a producer as the famous Tip-Top and the Croesus, which are contiguous to it.

The Company has acquired two extremely valuable claims of 20 acres each which are among the most promising properties in the Goldfield district of Nevada.

The claims in Goldfield are surrounded by developed mines, producing ore of immense value. The district in Nevada, embracing Tonopah, Goldfield, Bullfrog, Manhattan and other newly discovered fields is the richest in the world.

The Goldfield-Scranton Company also owns eleven Mining claims of 20 acres each in the very heart of the Hailey mining district, Idaho, developed to the producing point by shaft and drift and equipped with twenty-stamp mill and all necessary machinery.

The natural advantages possessed by the Company of inexhaustible wood and water supplies in close proximity to the Ketchum branch of the Oregon Short Line and Navigation Railroad Co., connecting with the Union Pacific at Ogden, to which a wagon road has been built and a daily stage line operates, solves the problem so frequently encountered in mining, i. e., cheap ore reduction.

The development work already done consists of a shaft 200 feet deep, from which drifts have been run from the 100 and 200-foot levels in each direction, a distance of from 75 to 200 feet each, and both the shafts and the drifts are well timbered.

The main ledge is from five to twenty-five feet in width and has steadily increased in value as depth has been attained, a significant fact in connection with all the big producing mines of this district. The ledge is practically vertical and can easily be traced on the surface for more than one-half mile, while the ledges on each side dip toward the main ledge, and experts predict that they will all come together at the lower levels.

The Company's mine is equipped with a twenty-stamp mill made by the Gates Iron Works, of Chicago, capacity of 100 tons of ore per day, shaft house, bunk house and accommodations for miners, blacksmith shop, large reservoir, steam hoist, engines and boilers, pumps, piping, ore bins, superintendent's house and office, and in fact everything necessary for operating the property on a moderate scale.

The ore can be mined and milled at the mine for less than \$3.00 per ton. Innumerable assays have shown an average of over \$14 per ton, yielding the handsome profit of \$11 per ton, net. On a tonnage of one hundred tons a day, the present capacity of the mill, at a minimum average profit of \$10 per ton, the Company would earn over 15 per cent. dividends per annum.

These properties are already developed to an extent that demonstrates beyond a question of doubt the existence of millions of dollars' worth of ore, only awaiting sufficient milling facilities to bring the hidden wealth to the surface. A limited amount of the stock of this Company, is now offered to the public on the basis which is ordinarily demanded by those owning properties in an entirely undeveloped condition and which are, in fact, nothing more than mere prospects.

Capitalization \$2,500,000 in shares of \$5.00 each. We offer a limited amount at \$2.50, full paid and non-assessable. The price will shortly be advanced to \$3.00.

# Batchelor Brothers Tobacco Company

CAPITAL STOCK, \$500,000

The Batchelor Brothers Tobacco Company owns the business of Bachelor Bros., the oldest cigar manufacturers.

The firm of Batchelor Brothers, 1st District, was established in 1853, over a half century ago; its factory is No. 1 in U. S. Revenue Dept. of Pa., a fact of great significance and value, showing that the business has been in continuous operation from its commencement. The firm became one of the largest and best known concerns in its line in the United States and enjoyed a reputation for the quality of its goods second to none.

Prior to the death of Mr. Edward Batchelor, the last member of the firm, upwards of 300 hands were employed at one time, and from 200,000 to 300,000 cigars turned out every week. It is the purpose of the Company to carry on the business on a much larger scale than at any time during the existence of the Batchelor Brothers co-partnership, when profits were made as high as \$110,000.00 per annum.

The Batchelor Brothers Tobacco Company, therefore succeeds to a business which has yielded a net income to an amount equal to 25 per cent. on its entire stock. It also succeeds to the good will of the former owners, whose brands of cigars are known throughout the country as the very best of their class, and a reputation of fifty years' standing which not only required half a century to build up, but the expenditure of hundreds of thousands of dollars in its establishment.

## Great Profits

The manufacture of cigars and tobacco is one of the leading industries of this country. The demand is constantly increasing, and is larger to-day for cigars per capita than ever before. The corporations and individuals engaged in the business are uniformly successful and prosperous, and some great consolidations have been made, as in the case of the American Tobacco Company and the United Cigar Stores Company, which are capitalized for many millions, whose stocks sell at prices way above par, and pay large dividends. The business is without risk, the goods being sold for practically cash, and established brands, such as this company produces, yield always a large profit on the cost of manufacture.

Owing to the great prosperity of this country, which is perhaps the greatest in its history, the conditions were never so favorable for the cigar and tobacco business, and the opportunity for volume of trade and the realization of great profits has never been equalled.

We offer a small allotment of stock at \$3.00, par \$5.00, full paid and non-assessable.

# The Allegheny Valley Water Company

We offer the following Bonds subject to prior sale and advance in price. We recommend this issue as safe and conservative investment.

Allegheny Valley Water Company authorized issue \$500,000; \$400,000 issued. \$100,000 held in treasury for future extensions and betterments.

## FIRST MORTGAGE 5 PER CENT. 30 YEAR

July 1, 1906

## GOLD BONDS

Due July 1, 1936

Interest Payable January 1st and July 1st      Denominations \$500 and \$1000

PRINCIPAL AND INTEREST MAY BE REGISTERED

FREE OF TAX IN PENNSYLVANIA

## Tradesman's Trust Company, Philadelphia, Trustee

THE ALLEGHENY VALLEY WATER COMPANY, organized under the general corporation law of the State of Pennsylvania, is a consolidation of the water companies in the various towns, as follows: Tarentown, Brackenridge, Natrona, Peterson and Hite, and also has charter and franchises for extending its pipes to Springfield and Cheswick, all situated on the west side of the Allegheny River in Allegheny County, Pennsylvania.

The population supplied at present by the Allegheny Valley Water Company is about 30,000. As planned and contemplated will add about 11,000, making a total population supplied of about 41,000.

We offer these bonds at 90 and interest, subject to prior sale and advance in price. Yield 5.10 per cent.
